

## Fluid End Upgrade Solution

Demand for high-pressure drilling modules is greatly increasing at record numbers and, with years dedicating in pumps, JES have been succeeded in supply of efficient and economic solution for different

### JES supply 7500PSI fluid modules for below pump style:

- BOMCO® F-1600
- HH® F-1600
- CSF® F-1600
- HBRS® F-1600
- EMSCO®FB-1600

**7500PSI Fluid Module**

As designed as an upgrade solution for existing mud pumps equipped with 5000PSI fluid ends, JES two-piece, “L” shaped 7500PSI module create added value for clients by increasing operating range and reducing maintenance and pump downtime. All JES 7500PSI modules are strictly tested for integrity.

### JES 7500PSI, two-piece, “L” shaped fluid end features:

- Premium alloy forging
- Stability
- Durability
- Efficient
- Easy maintenance
- Economic

## Other supreme parts for 7500PSI application:

To ensure the reliable and steady performance, JES has developed a full-line of premium parts for high pressure application, which are all manufactured according to API standard. With a strong engineer team, JES customize parts as per clients' request.

**7500PSI Manifold**

**Forged Pulsation Dampener  
(7500PSI)**

**Forged Six-way Block  
(Customization available)**
